

NESTLE NDL-30M

Smart measurement!

Product number :24107001

Topfeatures

- Small, light and easy to measure up to 30 metres
- 500 measurements per battery charge
- Fits in any trouser pocket

All special features at a glance

- Particularly small format
- Single measurement, Continuous, Max/Min
- Area and volume measurement
- Pythagoras measurement

Description

The NESTLE NDL-30M is a pocket-sized laser rangefinder. Despite its small size, it measures distances of up to 30 metres without contact. The integrated Li-ion battery is charged via the included USB-C cable (power supply not included). The NESTLE NDL-30M offers various distance measurement functions (min/max/tracking), area measurement, volume measurement and Pythagoras measurement.
